**Phone:** (+98) 912 331 1527  
**Location:** Tehran, Iran

### PROFILE SUMMARY

Results-driven Front-End Developer and Team Lead with 4+ years of professional experience building scalable, high-performance web applications. Deeply focused on React.js, TypeScript, and modern state management solutions, delivering complex multi-tenant platforms for national-scale clients including Iran's Ministry of Health. Adept at translating intricate business requirements into clean, maintainable, component-based architectures while maintaining a strong focus on user experience and interface quality.

### WORK EXPERIENCE

#### Front-End Developer & Team Lead

July 2021 – Present

Sepehr Company · Tehran, Iran

- Directed and mentored a front-end development team across multiple simultaneous healthcare projects, conducting regular code reviews to maintain code quality, consistency, and long-term maintainability
- Architected scalable front-end solutions for national-scale healthcare platforms — serving government ministries, medical centers, and private organizations across the country
- Established front-end development standards, reusable component libraries, and shared design patterns that accelerated delivery across all company projects
- Partnered closely with UI/UX designers using Figma and Adobe XD to transform wireframes into pixel-perfect, fully responsive interfaces
- Enforced role-based access control (RBAC) systems across multiple platforms, supporting distinct workflows for doctors, patients, administrators, and receptionists

### PROJECTS

#### Salam Operator — Ministry of Health National Healthcare Platform

April 2025

Sepehr Company · [inhso.ir](#)

- Directed the front-end team in designing and delivering one of Iran's three official national health operator platforms under the Ministry of Health
- Built a comprehensive telemedicine system featuring online medical consultations, video and text-based appointment scheduling, and integrated patient health record management
- Integrated real-time communication features and seamless third-party services for patient data synchronization at national scale

Redux Toolkit

TanStack Query

Tailwind CSS

#### Payesh — Occupational Health Monitoring System

October 2025

Sepehr Company · [payesh.inhso.ir](#)

- Guided the front-end team in architecting a multi-tenant occupational health monitoring platform serving organizations and medical centers through role-based dashboards with granular permission controls
- Engineered 30+ specialized medical form modules covering organ-specific evaluations, audiometry, spirometry, and lab panels — leveraging Redux Toolkit for cross-form state persistence
- Crafted multi-step onboarding wizards with dynamic form logic, cascading dependent dropdowns, and SMS-based verification flows
- Designed a contract management pipeline connecting organizations to accredited medical centers for structured employee health monitoring services

#### PicoPet — Veterinary Healthcare Platform

January 2026

Sepehr Company · [picopet.ir](#)

- Architected the front-end of a bilingual (Persian/English) pet healthcare platform connecting pet owners with veterinarians for online appointment scheduling, digital prescriptions, and vaccination tracking
- Shipped feature modules for clinic and doctor discovery, visit history management, invoice processing, and role-based dashboards for clients, doctors, and administrators
- Delivered full RTL/Persian internationalization support alongside a seamless LTR English interface

PROJECTS (continued)

Sepehr Online Pharmacy System

July 2022

Sepehr Company · [pharmacy.isikato.ir](#)

- Directed the front-end team in architecting a comprehensive pharmacy management platform currently operational across multiple active branches
- Engineered modules for drug inventory tracking including expired medication management, multi-insurance prescription processing workflows, and an online storefront for patient orders
- Designed and executed dedicated high-performance interfaces for pharmacists and administrative staff

Ant Design

Sepehr Salamat — Medical Center Management System

October 2021

Sepehr Company · [inhs.isikato.ir](#)

- Engineered core front-end services for healthcare centers including insurance-supported prescription workflows, appointment scheduling, and comprehensive patient record management
- Crafted dedicated, high-performance user panels tailored specifically for doctors, receptionists, and patients with distinct workflows per role
